

NT100Ge Solder Bar and Wire

Physical Properties

| | |
|--|---------------|
| Melting Temp (°F) | 440.6 |
| Melting Temp (°C) | 227 |
| Density (kg/cm ³) | 7.4 |
| Expansion (%) | 48 |
| Deformation in the Traction | > 300 hours |
| Electrical Conductivity (μΩm) (with 1 kg load at 180°C) | 40.09 |
| Resistance to Traction (N/mm ²) | 32.3 |
| Thermal Fatigue (-40/+80°C) | > 1000 Cycles |

Chemical Composition

| ELEMENT | NT100Ge (%) | SN100C™ (%) |
|----------------|--------------|---------------|
| Tin (Sn) | Balance | Balance |
| Copper (Cu) | 0.6 - 0.8 | 0.6 - 0.8 |
| Germanium (Ge) | 0.005 - 0.02 | 0.005 - 0.007 |
| Nickel (Ni) | 0.04 - 0.06 | 0.04 - 0.06 |
| Silver (Ag) | Max. 0.05 | Max. 0.05 |
| Aluminum (Al) | Max. 0.002 | Max. 0.002 |
| Arsenic (As) | Max. 0.03 | Max. 0.03 |
| Gold (Au) | Max. 0.03 | Max. 0.03 |
| Bismuth (Bi) | Max. 0.03 | Max. 0.03 |
| Cadmium (Cd) | Max. 0.002 | Max. 0.002 |
| Iron (Fe) | Max. 0.02 | Max. 0.02 |
| Indium (In) | Max. 0.03 | Max. 0.03 |
| Lead (Pb) | Max. 0.05 | Max. 0.05 |
| Antimony (Sb) | Max. 0.05 | Max. 0.05 |
| Zinc (Zn) | Max. 0.002 | Max. 0.002 |

Limits are % max unless otherwise shown as range or stated otherwise. Except where otherwise indicated, the component elements in each alloy shall deviate from their nominal mass percentage by not > 0.10% of the alloy mass when their nominal percentage is ≤ 1.0%; by not > 0.20% of the alloy mass when their nominal percentage is > 1.0% to ≤ 5.0% or by not > 0.50% when their nominal percentage is > 5.0%.

Quality Metals Since 1789

ISO Certified Since 1997 / Tin / Tin Alloys / Solder / Nonferrous Metals

ATTRIBUTES

Produced using the same chemical composition as the solder alloy marketed as SN100C® by Nihon Superior Sha Co., Ltd. and its licensees*, NT100Ge is a high-quality, low-cost alternative to silver-bearing solder. The eutectic tin-copper-nickel alloy creates a shiny, smooth, robust interconnect for a wide range of electronics assembly requirements. With a melting temperature of 441°F, NT100Ge is compatible with all wave and selective solder equipment. Similar to the effect of phosphorous in Sn63 alloys, the small addition of Germanium in NT100Ge serves as a de-oxidant, which keeps drossing to a minimum. For PCB fabrication applications such as the hot air solder leveling (HASL) process during which copper levels increase, NT100GeX provides a low-copper solder solution.

NT100Ge can be used as a drop-in replacement for any existing 99C or SN100C solder bath, without the need for pot dumps or swaps. Once NT100Ge is in use, Nathan Trotter offers free, unlimited solder analysis to help maintain J-STD specifications and an optimal soldering process.

NT100Ge is available as extruded 1 kg tri-bar, 7 lb. feeder bar, and solid wire on spools.

- Consistently smooth and shiny solder joint
- Low-cost, lead-free solder alloy (no silver content)
- Superior wetting and performance
- Minimal dross
- Eutectic properties create efficient melting and freezing
- Operating temperature of 290°C - 320°C, similar to other lead-free solders

*This solder alloy was previously subject to a patent (US6180055) that expired in March 2019. Nihon Superior Sha Co., Ltd. holds a separate patent for a solder joint (US8999519B2) with a distinct chemical composition, consisting of, among other things, either exactly .01% by weight Cu or 7.6% by weight Cu. NT100Ge has a certified copper content of .5-7% which lies significantly outside the solder joint patent criteria. If there are concerns about the full scope of the US8999519B2 patent or solder joint composition, please consult an attorney. Nathan Trotter & Co., Inc. does not possess or confer to customers any intellectual property rights relating to the composition of their solder joints or the name SN100C®, which is a registered trademark of Nihon Superior Sha Co., Ltd.

APPLICATION

Nathan Trotter solder bar performs favorably in wave soldering, solder dip, and solder coating applications. For solder plating applications, please refer to Nathan Trotter ANODES.

BAR AND WIRE SIZES

Standard sizes typically vary by application.

| Application | Bar Description | Approx. Weight |
|----------------------|--|---|
| Wave (PCB/THT) | Kilo Bar, Tri Bar, Feeder Bar, 3-6 mm Wire | 2.2 lbs., 2.2 lbs., 7 lbs. Various Spools |
| Radiator | Ingot, Handy Bar, Notch Bar, 3-6 mm Wire | 40 lbs., 20 lbs., 7 lbs., Various Spools |
| Industrial (Battery) | Ingot, Finger, Shot | 60 lbs., 1 lb, 2 grams |

PACKAGING

Packaging can be made to customer specification. Standard packaging is either boxed (22 lb. or 50 lb. boxes) or in the case of larger ingots, stacked and wrapped on a pallet. Each box is labeled with the alloy name, lot number, date of manufacture, weight of packaging unit, and any customer specific information required. Each bar is stamped with the alloy name, lot number, and Nathan Trotter branding. Each lot is accompanied by a certificate of analysis showing lot-specific chemistry.

POT MAINTENANCE

In conjunction with the use of Nathan Trotter solder bar, the company offers a complimentary solder pot analysis program to ensure the user's application remains at optimal chemistry. In-house OES spectrometers are used for a timely turnaround for customer samples. It is recommended that this program is utilized regularly to verify pot chemistry is within operating specification.

RECYCLING / RECLAIM

Tin Technology and Refining (www.tintech.com) is the recycling/reclaim division of Nathan Trotter. Tin Tech works in conjunction with Nathan Trotter solder bar customers to recycle dross, drippings, residues, paste, and other solder scrap that is generated from the use of solder. Tin Tech operates as a permitted, environmentally responsible smelter with full reduction capabilities enabling optimal recoveries for all types of solder scrap material.

STORAGE, HANDLING, SHELF LIFE

Nathan Trotter Solder Bar has an infinite shelf life when stored in a dry, non-corrosive environment. Bars and packages should always be handled with care as material is naturally heavy.

HEALTH AND SAFETY

This product, during handling or use, may be hazardous to your health. Read the Safety Data Sheet (SDS) and warning label prior to use. SDS can be downloaded from our home page www.nathantrötter.com
